Subject: Collage of Drone Photos of Lake Junaluska Drained for Silt Removal.

The following photos were taken from a P3 Drone at various locations around the top end of Lake Junaluska on 3/5/2016 and 3/6/2016. The first day had a light overcast, while the second day was bright and sunny. These present a normally unseen perspective of the lake, at altitudes up to nearly 400 feet above normal lake level. Photos are left in their original resolution, allowing you to magnify the photo while still retaining excellent pixel resolution.
